

Abundance, Wealth and Commitment to Excellence

Marcus de Maria and Christine Miller

Marcus de Maria's philosophy for his Investment Mastery business is based on a mission to raise humanity's abundance consciousness through financial education. Currently, education in financial wellbeing is not part of the school curriculum, and the general 'money mindset' in the UK is not geared to wealth creation – rather, we are encouraged towards consumption with little regard for our future wealth.

Recognising that many people have 'poverty consciousness' as their normal way of thinking about money, the 'Wealth Workout' weekend course is designed to create an environment where people can learn, grow and overcome their financial fears, and start to drive towards their financial certainty.

The fact is that the wealthy are *committed* to being wealthy; whereas the poor either believe it is bad to be wealthy, or have mixed emotions, holding the idea that if they prosper, someone else must correspondingly be deprived. The poor are less able to envisage the possibilities of creating sufficient wealth to enable others to also create wealth. Wealth is a mindset, a dedicated and total commitment to being and living wealthily. Below are the skills as presented in the course, which when mastered lead to wealth:

The Five Skills of Financial Wealth

- Remove debt
- Make money
- Save
- Invest
- Re-invest profits for compound growth

ReSource attended a **Wealth Workout Weekend** and we discovered that many people have deeply entrenched views and beliefs about their ability to be wealthy and their right to be rich. In fact, there are such commonly held negative ideas around money that Marcus and his team can predict almost exactly what most of their students will be feeling around their wealth situations, and therefore they structure the course to enable this deep-seated programming and unworthy mindset to be unearthed, examined and eventually eradicated through a carefully designed series of exercises, examples and support mechanisms.

What this powerful two day course offers is practical ways to revamp your thinking and your actions around your wealth – if you want to take control and become financially independent with a strong belief in your abilities to create wealth, then attend this course.

Being aware of the importance of ongoing support, and that often we attend a course, leave with good intentions and then forget to take action - Marcus and his team arrange follow up weekly conference calls, monthly meetings and an online discussion forum because this is where most people maintain the momentum to create wealth.

Testimonials:

"Since attending the wealth workout we have started our own business and are now working for ourselves. We have also recently exchanged on another investment property and are in the process of developing our own property portfolio. Through the people we were introduced to over the weekend we have been able to take advantage of an opportunity to invest in land in Eastern Europe with a guaranteed return on our investment of 60% over 3 years. We are also actively trading on the stock market using new strategies learnt through Marcus. Through the principles taught at the wealth workout weekend we have been able to define clear goals for attaining wealth in 2007 and are confident that we have the tools available to realise these goals. Thanks again to Marcus and the Wealth Workout team for a fantastic weekend and all your help and support both during and beyond the wealth workout."

Phil and Emma Staniforth, Liverpool

"I must admit I went to the Wealth Workout more for my teenage son who I feel was lacking direction. He was earning just £150 a week, and had no real vision where he was going. When he heard the concepts from the Wealth Workout, he had some major breakthroughs. As soon as he got home he wrote out his financial vision and a plan on how to get there, just as we were taught. He is now earning £800 a week, which is more than I am earning. I cannot thank you enough. He knows what he wants and we couldn't be happier. I have organised for Marcus to come and talk locally because I have seen the positive effect of his wealth creation material."

Julie McCracken, Colchester
